SEC. 2. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) foreign investment provides substantial economic benefits to the United States, including the promotion of economic growth, productivity, competitiveness, and job creation, and the majority of foreign investment transactions pose little or no risk to the national security of the United States, especially when those investments are truly passive in nature;

(2) maintaining the commitment of the United States to open and fair investment policy also encourages other countries to reciprocate and helps open new foreign markets for United States businesses and their products;

(3) it should continue to be the policy of the United States to enthusiastically welcome and support foreign investment, consistent with the protection of national security;

(4) at the same time, the national security landscape has shifted in recent years, and so have the nature of the investments that pose the greatest potential risk to national security, which warrants a modernization of the processes and authorities of the Committee on Foreign Investment in the United States;

(5) the Committee on Foreign Investment in the United States plays a critical role in protecting the national security of the United States, and, therefore, it is essential that the member agencies of the Committee are adequately resourced and able to hire appropriately qualified individuals in a timely manner, and that those individuals’ security clearances are processed as a high priority;

(6) the President should conduct a more robust international outreach effort to urge and help allies and partners of the United States to establish processes that parallel the Committee on Foreign Investment in the United States to screen foreign investments for national security risks and to facilitate coordination; and

(7) the President should lead a collaborative effort with allies and partners of the United States to develop a new, stronger multilateral export control regime, aimed to address the unprecedented industrial policies of certain countries of special concern, including aggressive efforts to acquire United States technology, and the blending of civil and military programs.
