PROCEEDINGS AND DEBATES OF THE 115th CONGRESS, FIRST SESSION

Vol. 163

WASHINGTON, THURSDAY, NOVEMBER 2, 2017

No. 178

House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mrs. MIMI WALTERS of California).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
November 2, 2017.

I hereby appoint the Honorable MIMI WALTERS to act as Speaker pro tempore on this day.

PAUL D. RYAN,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 3, 2017, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties. All time shall be equally allocated between the parties, and in no event shall debate continue beyond 11:50 a.m. Each Member, other than the majority and minority leaders and the minority whip, shall be limited to 5 minutes.

REMEMBERING PAT GILBREATH

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. AGUILAR) for 5 minutes.

Mr. AGUILAR. Madam Speaker, today, I rise to honor the life of someone I was lucky to call a colleague and mentor—Redlands City Council member Pat Gilbreath.

I was heartbroken to learn of Pat's passing in early October, but I will always be grateful for her countless contributions to our community. Her imprint can be seen throughout the city

of Redlands and our region. She was the earliest advocate for Redlands' passenger rail, supported the Healthy Communities Initiative and Open Space Initiative to honor our citrus heritage.

When I was just starting out on the city council, Pat's leadership and poise helped shape the type of public servant that I aim to be. She was pragmatic, measured, and listened intently to the public.

I will always be thankful for everything that she taught me, not the least of which was how to hide the chocolate in the city council dais so we could eat it during our late night council meetings.

A loving mother and grandmother, she was always proud to beam about her family. I know that when they look at her legacy and the impact she made in the community, her family can be just as proud of her.

Pat will always be remembered in our region for her thoughtfulness, her dedication, and her problem-solving ability. I will always remember her for her friendship.

ERIE COUNTY INNOVATION BEEHIVE SUPPORTS ENTREPRENEURS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. THOMPSON) for 5 minutes.

Mr. THOMPSON of Pennsylvania. Madam Speaker, I recently visited the Innovation Commons at Penn State Behrend in Erie County, which is an idea lab that offers support for entrepreneurs and startup companies.

It opened in January of 2016 to innovators, including those at the student level, who sought a place to organize, collaborate, compose, and construct their ideas.

The Innovation Commons is a part of the Innovation Beehive, which is

housed at, and managed by, Penn State Behrend. It is in partnership with three additional Erie County universities: Mercyhurst, Gannon, and Edinboro. It was the first of its kind in 2016, and its success established a business network across Erie County—or, in other words, the beehive.

The beehive sites will operate as both individual service providers and as part of a larger, connected network, with multiple points of entry for entrepreneurs. All services will be available to the public and to businesses seeking to develop new products or enter new markets.

Each lab will specialize in different aspects of product or business development:

Edinboro University will provide advertising, marketing, and public relations strategies for business startups. Both current students and those entrepreneurs in the community can all seek assistance with all of these universities. The lab, which will be equipped with high-end printers, art supplies, drafting tables, and other multimedia support, will be located in the Baron-Forness Library;

Gannon University will focus on business development, including business analysis. The Gannon beehive, which will be located in the Center for Business Ingenuity, will offer access to the Small Business Development Center and the Erie Technology Incubator;

Mercyhurst University will provide business intelligence services and solutions to help developers commercialize their ideas. Blended faculty-student teams will use high-end computers, plotters, and other tools to develop custom intelligence products from within the Ridge College of Intelligence Studies.

Madam Speaker, this northwest Pennsylvania Innovation Beehive network is working to serve the region. It will enable innovators to access universities' resources and applied research

capabilities for new business development or expansion at little to no cost.

I recently participated in a roundtable discussion with the university presidents, and I am very excited to see this collaborative effort take root in Erie County. This network was made possible thanks to the Ignite Erie Industry and Business Acceleration Collaborative, the Erie County Gaming Authority, and the Appalachian Regional Commission.

This truly is a collaborative effort, and it is my hope that the beehive will soon be abuzz with good ideas throughout Erie County. This is an excellent partnership that will give innovators and students hands-on, real-world experience to test their ideas and make their dreams become reality.

Madam Speaker, I am glad to see Erie County leveraging the strengths of these four universities for the betterment of its community. It is an exciting time in Erie County. I look forward to seeing what this brings to the region.

REPUBLICAN TAX PLAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. JEFFRIES) for 5 minutes.

Mr. JEFFRIES. Madam Speaker, the so-called Republican tax plan will increase taxes on the middle class, explode the deficit, and undermine Medicare and Medicaid. It will saddle your children and grandchildren with more than \$1 trillion in debt, simply to provide millionaires and billionaires with a massive tax cut.

Now, House Republicans will argue that trickle-down economics, supply-side economics, and dynamic scoring will somehow magically save the day. But the notion that massive tax cuts for millionaires and billionaires will somehow result in strong economic growth is a phony, fraudulent, and fake argument. It has no basis in reality. There is no evidence to support this fantasy.

When Ronald Reagan cut taxes on millionaires and billionaires, it didn't result in strong economic growth. It led to a massive deficit.

When George W. Bush cut taxes on millionaires and billionaires, it didn't result in strong economic growth. It led to the Great Recession.

When the Republican Governor of Kansas cut taxes on millionaires and billionaires, it didn't result in strong economic growth. It led to prison riots, overcrowded schools, and crumbling infrastructure.

We cannot allow this scheme to happen to the United States of America. The American people deserve a better deal.

VETERAN-OWNED SMALL BUSINESSES

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. FITZPATRICK) for 5 minutes.

Mr. FITZPATRICK. Madam Speaker, our veterans represent one of the most highly skilled workforces in American history—the product of rigorous training, an ironclad commitment to teamwork, and the remarkable ability to succeed where others might fail. It is no wonder that veterans are 45 percent more likely to be self-employed than nonveterans. In total, veteran-owned businesses make up nearly 10 percent of all businesses in the United States and account for more than \$1 trillion in business receipts every year.

One of those businesses is Navmar Applied Sciences Corporation, based in Warrington. Owned by Air Force veteran Tom Fenerty, Navmar engineers technology to make sure that our military has the best tools possible to complete any mission. Tom has also committed to employing veterans in the community. I am privileged to represent Tom and others like him in Congress.

In honor of their service—both in uniform and as part of our economy—I am proud to recognize the importance of veteran-owned small businesses in our community by introducing and supporting H. Res. 588, which recognizes National Veterans Small Business Week this week, from October 30 to November 3.

Madam Speaker, I urge my colleagues—and all Americans—to join me in supporting the veteran-owned small businesses in our community.

NATIONAL OBESITY CARE WEEK

Mr. FITZPATRICK. Madam Speaker, I rise today to recognize National Obesity Care Week and the over 90 million adult Americans living with obesity. National Obesity Care Week is recognized during the first week of November, when individuals and organizations from across the country raise awareness about the serious chronic disease of obesity.

Leading medical organizations, including the American Medical Association, the Obesity Society, the American Academy of Family Physicians, the American Association of Clinical Endocrinologists, and the World Obesity Federation, all recognize obesity as a disease and the belief that it should be treated as such.

National Obesity Care Week aims to advance an evidence-based understanding of obesity and widespread access to respectful, comprehensive, and appropriate care. Obesity is a complex disease, linked to over 50 disorders, including type 2 diabetes, hypertension, and cardiovascular disease. Over \$1.4 trillion is spent in the U.S. on direct and indirect costs for health-related conditions related to obesity each year.

This must change, Madam Speaker. It is time for action, and I commit to being part of the solution to improve care for obesity. I urge my fellow Members to join me in recognizing obesity as a serious, chronic disease and working towards improving access to evidence-based tools for chronic weight management.

DREAMERS

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Massachusetts (Ms. CLARK) for 5 minutes.

Ms. CLARK of Massachusetts. Madam Speaker, DREAMers are young people who are fighting to give back to the only country they have ever known as home. They are not political bargaining chips, and they didn't ask to be at the center of this immigration debate. They were brought here before they were old enough to know the difference. They grew up as our neighbors, our kids' classmates, and our friends. They are also taxpayers, teachers, medical students, and they are young people who are signing up to serve in our military.

Let me tell you about some of the DREAMers I have met in my district.

Richard Kim is a student at Tufts University. He was brought here by his parents from Korea when he was just 2 years old. His parents sacrificed a great deal in America—even becoming homeless and living in a car for a while—for the chance that Richard would have a better life than they had.

Their son worked hard, got good grades, and, ultimately, was admitted into one of the best schools in the country. Now he is a freshman at Tufts University, studying international relations. One day, he wants to work here in Congress. Richard calls himself 100 percent American. In his words, he says: I grew up here just like everyone else. I want to make a difference in America because this is the place I call home.

Let me tell you also about Mario Delgado.

In Mario's words, he says: I know what it is like to live like a shadow in a room full of light, keeping my head down to make sure that I don't get sent back to a country that I know nothing of.

So Mario kept his head down. He studied, worked through high school to help pay the bills, and saved up money for the future. Mario expects to graduate from college next year. He wants to work in the renewable energy industry. He says he intends to help America with the advancement of fusion energy.

And then there is Marla, who started attending school in Framingham, Massachusetts, when she was in the first grade. She describes learning American history, listening to popular music, and watching the Disney channel like the rest of her friends, but something was different.

□ 1015

Unlike her friends, she realized she couldn't get a driver's license. As a teenager, she suffered the crushing fear that every knock on the door could mean that she would never see her loved ones again. She feared that applying for college would mean exposing her family, a cruel reality for someone who was the valedictorian of her graduating class.
