

hereditary oligarchical elite like the hereditary oligarchical elite in Russia today.

This huge penthouse suite party will be paid for by the rest of us and blow a record-smashing \$2 trillion deficit hole into our economy and programs like Medicare and Medicaid. I knew all of this. It is predictable enough.

But then I noticed a provision yesterday that is absolutely gobstopping, shocking, startling, eye-popping, unbelievable in the GOP tax blueprint. It is called the territorial system, and what it means is simple. We will tax American businesses only when their operations are here in America. Here is what that means: if I am a businessman and I am going to set up a manufacturing plant on main street in my hometown, I have to pay the full freight of taxes. I pay everything.

If I set my business, my new manufacturing plant, up in Mexico, or Bangladesh, or Ireland, I pay zero taxes. Let me repeat that: if I decide to set up my business in America, I pay 100 percent of the taxes I am going to owe. If I decide to relocate my business and all of the jobs abroad, I will pay zero taxes. That works even if I have already got the business in place here and I decide to ship everything overseas. Suddenly, I get a 100 percent tax break for all the profits that I earn overseas.

Mr. Speaker, perhaps I misunderstand it. I am not a professor of tax law. I am a professor of constitutional law. So maybe I am not interpreting it right. I would love nothing more than for one of my colleagues from the other side of the aisle to get up and tell me it is not true, and correct me, and explain what I have got wrong.

But if I have got it right, this shocking provision tucked into the bill that we are about to see is a job killer, a national emergency, and a dagger pointed at the heart of the American economy and our jobs. It is only a few, small, big businesses, a few big businesses that will benefit.

Small businesses are not going to be benefited at all. The small businesses do not set up tax-dodging corporate subsidiaries in the Cayman Islands, or the Bahamas, or in Ireland. They don't ship overseas. So this is for a tiny percentage of the largest corporations in America, leaving the small businesses behind and taking millions of American jobs with them.

Why would the majority do this to us when Donald Trump campaigned on a platform of putting America first and promising to bring American jobs back home—not export millions more with a devastating tax plan?

Now I see why they are hurdling this through Congress. In 1986, with the tax reform plan, there were 63 days of hearings, and more than 450 witnesses in Ways and Means and the Senate Finance Committee. It took 2 years and 10 months. This plan they want to slam through Congress in less than 2 weeks, with barely any witnesses, maybe no

hearings, maybe one or two hearings; and you know why? Because they are tucking the most massive job-killing provision anyone has ever seen into this bill.

If anything, we should be imposing higher taxes on those businesses that ship our jobs overseas—not lower taxes—or they should pay the same. But this plan would wipe out any taxes at all, and it is dumbfounding that they would think this is something that Congress would put up with—just like they tried to slam through Congress the ACA repeal and we stopped it when people got the word.

We have got to make sure, Mr. Speaker, that every American understands what is really in this tax bill coming our way.

HIGHLIGHTING THE STEP FORWARD TO CURE TSC MIAMI WALK

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Florida (Ms. ROS-LEHTINEN) for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, I wish to highlight the Step Forward to Cure TSC Miami Walk, which took place last weekend at my alma mater, Florida International University. Tuberous sclerosis complex, or TSC, is a rare genetic disease that causes uncontrollable tumor growth across the face, body, and organs of impacted individuals.

Unfortunately, there is no cure for TSC. South Florida's own hero, Max Lucca, pictured here, was diagnosed with TSC when he was only 2 weeks old. Now, he is 9 years old, and he has thrived because of the constant love and care provided by his parents, Vanessa and Max. The TSC Miami Walk brings together patients like Max Lucca and their families with supporters who are committed to improving their lives.

Every year, the walk plays an essential role in advancing lifesaving research and programs to increase awareness of TSC, and expanding the network of resources that improve the lives of patients and their families.

Mr. Speaker, I would like to recognize the work of Vanessa Vazquez; her husband, Max; and all of the other activists who are so needed from the Tuberous Sclerosis Alliance who work so hard to make this walk a reality.

I want to thank everyone who came out to FIU last Saturday and made this event a resounding success. Due to your efforts, due to your commitment, I am confident that we will be able to increase the research and education needed to find a cure for this tragic disease.

Meanwhile, go Max Lucca.

COMMIT TO ENDING PEDIATRIC HIV/AIDS WORLDWIDE

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to encourage my colleagues to support H. Res. 593, a bipartisan resolution reaffirming our national com-

mitment to ending pediatric HIV/AIDS worldwide.

It is a resolution that I introduced with my friend, Congresswoman BARBARA LEE. The fight against pediatric AIDS is a great example of how our country is a positive and transformative force in the lives of many across the world. Because of our leadership here in the United States over the past 12 years, there has been a 62 percent increase in the number of women receiving mother-to-child transmissions prevention services. Wow.

Thanks to positive American involvement through programs like PEPFAR, more than 11.5 million expectant mothers around the world have received HIV testing and counseling, and nearly 2 million babies have been born HIV-free.

However, even though we have made great strides in a fight against pediatric AIDS over the last few years, we cannot rest, Mr. Speaker. We cannot rest while more than 400 children around the world are born with HIV every day; 400. We cannot rest when less than half of the children suffering from HIV have access to the lifesaving treatments they so desperately need; less than half. Indeed, we must redouble our efforts to reach every single mother and child impacted by this terrible disease.

For this reason, my friend, Congresswoman BARBARA LEE, and I just reintroduced H. Res. 593, a bipartisan resolution recommitting our country, the United States, to eradicating pediatric AIDS worldwide and supporting those who have been impacted by this epidemic. Our resolution also supports our national efforts to provide women and children with HIV counseling, with HIV testing services, as well as expanding their access to lifesaving treatments.

America's ongoing commitment has helped save the lives of many, but so much more remains to be done. We are one of the greatest hopes for a better future for countless others. Now, more than ever, it is essential to ensure that we remain committed as a nation to creating a future where no child suffers from HIV/AIDS.

I urge my colleagues to support this worthwhile cause and cosponsor our resolution, H. Res. 593.

SIGN UP FOR HEALTHCARE NOW

The SPEAKER pro tempore. The Chair recognizes the gentleman from Tennessee (Mr. COHEN) for 5 minutes.

Mr. COHEN. Mr. Speaker, today is the last day of baseball, but, more importantly, it is the first day of open enrollment for the Patient Protection and Affordable Care Act.

This year, enrollment only runs from November 1, today, through December 15. This is half the length of last year when open enrollment extended until January 30. It is 6 weeks shorter, so to sign up, get started today. You only have 45 days to do it. This is something the Trump administration is doing to
